(for Initial Notices dated on or before 28 February 2017)

Important Notes

The CICAIR Ltd (*herein referred to as CICAIR*) complaints process enables complaints to be raised about Approved Inspectors with the objective of ensuring that professional standards are maintained and the Code of Conduct for Approved Inspectors is adhered to. Please note that:

- The CICAIR complaints process **does not** provide for financial penalties against Approved Inspectors or the awarding of costs or financial redress to complainants.
- Complaints must, in the first instance, be fully exhausted using the Approved Inspector's own complaints process.
- CICAIR cannot consider complaints based on a Building Regulation technical assessment, a misunderstanding or dissatisfaction with the minimum standard set by the Building Regulations or on criticisms of the quality of workmanship. Please read Appendix A to this form for more information.
- CICAIR will only consider complaints against an alleged breach of the Code of Conduct for Approved Inspectors. For a complaint to be upheld it must be demonstrated that a breach of the Code of Conduct for Approved Inspectors has taken place. Please read Appendix B to this form for more information.
- Complaints cannot be progressed if there is legal action in process involving the Approved Inspector or complainant in relation to the dispute.
- The time limit for lodging a complaint with CICAIR is a maximum of 6 years for clients under contract and 10 years for users of buildings.

Should your complaint be accepted by CICAIR, the complaint form and all your supporting evidence will initially be sent to the Approved Inspector for them to respond to the allegations. The CICAIR complaints committee protocol sets out, in detail, how CICAIR will handle complaints. Should you require a copy of this protocol, please contact us.

CICAIR will endeavour to complete a complaint investigation within 100 working days. This timescale is not binding, however, and various factors such as the complexity of the complaint and workload demands may necessitate the allocation of further time to the investigation.
